A hint for your life

Pollen-Allergy Prevention Measures at Home

(Ehime Shimbun, March 4, 2022)

You should take countermeasures to ease pollen allergy symptoms in your daily life

When you return home, you should shake the dust out completely before entering the house. In order to avoid carrying pollen inside with you, hang your coat and hat at the entrance. Never fail to wash your face and hands, and gargle as well.

When you open the window to let fresh air in, open windows at night or early in the morning because there's less pollen in the air. If you need ventilation in the daytime, open the window only 10 cm wide using a ventilation fan or a screen door to reduce pollen entry, but refrain on windy days. It is also important to wipe the floor or furniture frequently while making use of an air cleaner or humidifier. It's also better to hang the laundry indoors and dry the futon and cover with a futon dryer.
